

PARASURE

Type 4 chemical indicator

FOR VHP / H2O2 Sterilisation processes

The ParaSure Type 4 chemical indicator for all calibrations of VHP, H2O2 and plasma sterilisation processes. ParaSure Type 4 Multi-Parameter Indicators for Ethylene Oxide Sterilization conform to EN ISO 11140-1 Type 4.

- Conforms to requirements of ISO 11140 - Part 1 Type 4
- CE Marked
- Non-toxic
- UDI Numbered
- Tyvek substrate
- Patented Design
- It is easy to read and interpret.

The Type 4 chemical indicator

The ParaSure Type 4 chemical indicator for all calibrations of VHP, H2O2 and plasma sterilisation processes.

ParaSure Type 4 Multi-Parameter Indicators for Ethylene Oxide Sterilization conform to EN ISO 11140-1 Type 4.

The clear colour change from yellow to orange is easy to interpret. Laminated and precisely calibrated, they can detect the correct balance between Time, Temperature, Relative Humidity and Concentration of ETO.
